

PRODUCT GUIDE
2022

Protecting natural resources.

Preventing pollution.

Reducing waste.

“We strive towards continual improvement in our environmental performance and endeavour to minimise the scale of our adverse impact on the environment by setting, implementing, monitoring and reviewing environmentally conscious operational objectives and targets.”

Recognising the long term benefits to our business and our customers we are committed to taking an active part in protecting natural resources, preventing pollution and reducing waste.

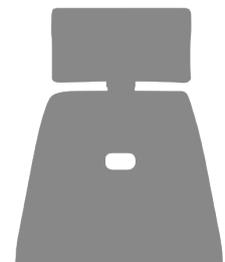

QR Code Scanning

Adding QR Codes which allow users to access unbranded operating and assembly instructions has resulted in a reduction of printed sheets of paper, totalling approximately 50,000 less printed sheets per year!

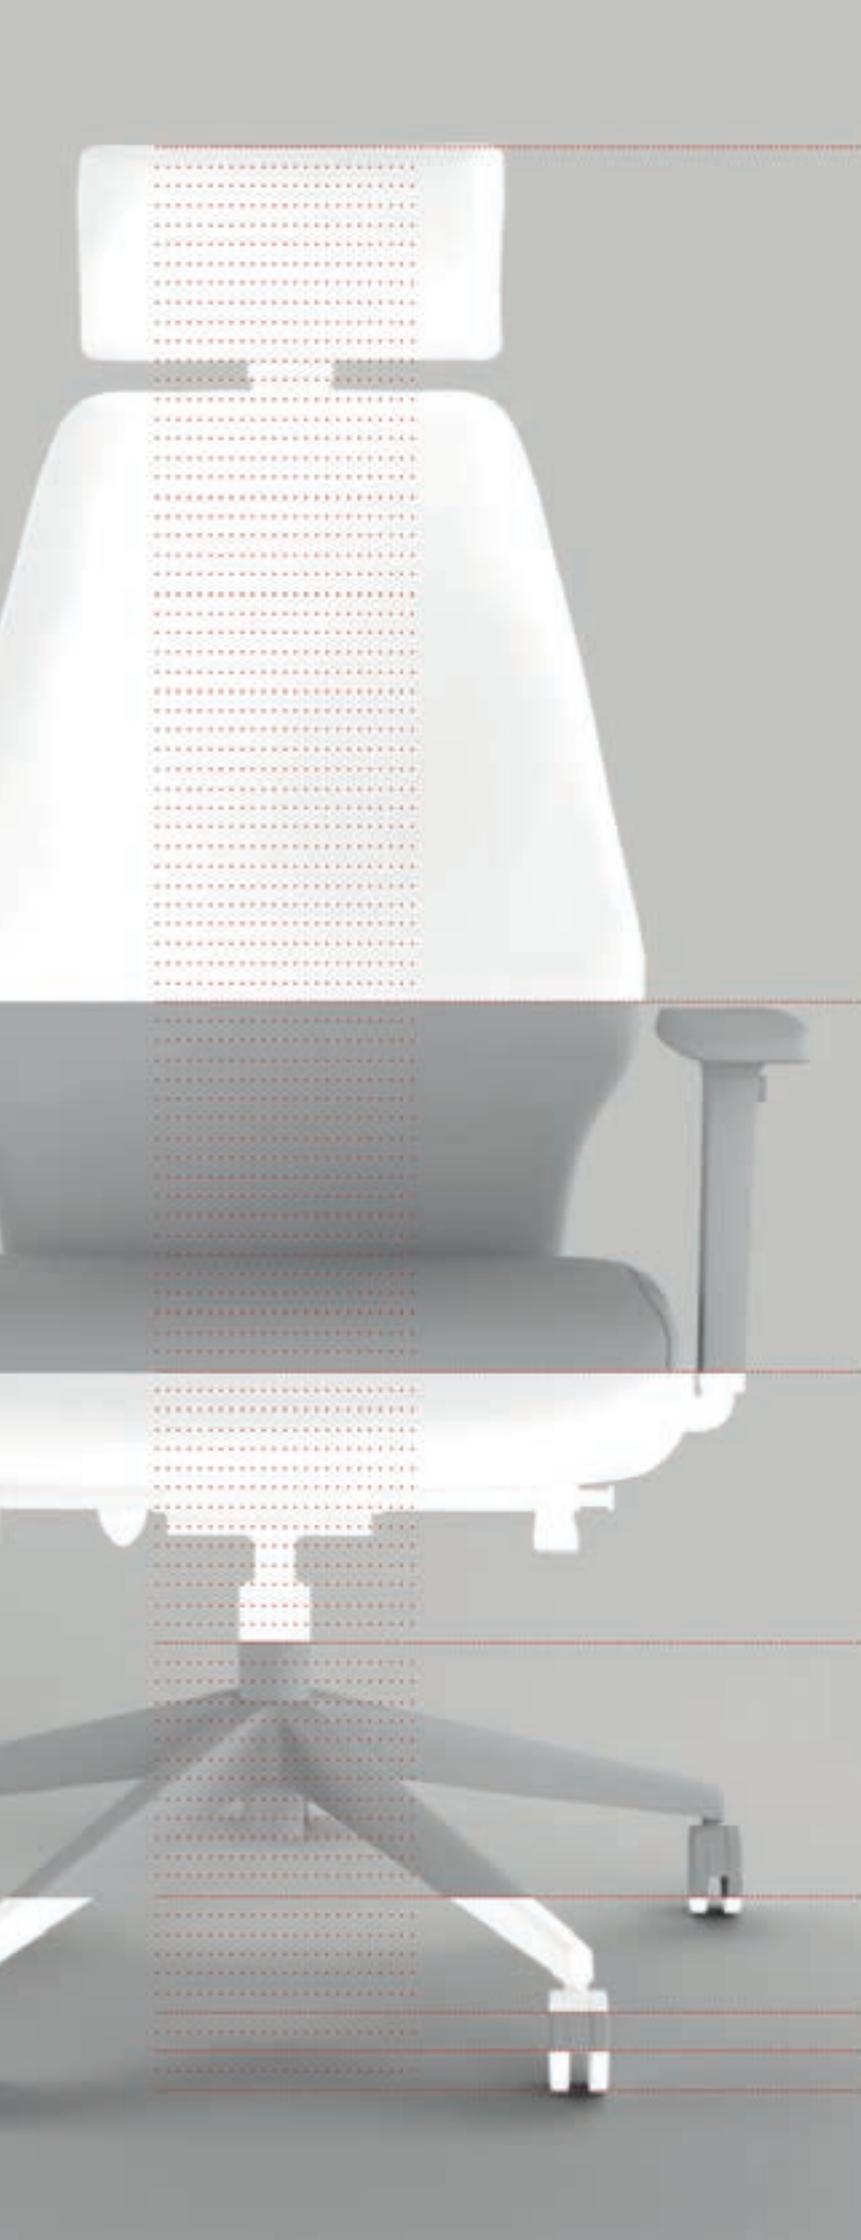

Continual Improvement

We continually strive for environmental excellence, changing and creating processes to help us lower our carbon footprint. We are delighted to say that our BSI ISO:14001 accreditation has been successfully renewed.

Glue-less Technology

We have developed and enhanced our manufacturing techniques, enabling us to build our upholstered swivel chair backs with an E-badge, resulting in the product becoming totally glue-less.

Component Breakdown

We only use the highest quality components when building our products. The chairs featured in this presentation are constructed from:

44%
Steel

19%
Polypropylene

14%
Aluminium Castings

13%
Plywood

6%
PU Foam

2%
Fabric

2%
Nylon

The chairs featured in this presentation contain up to

37%
Recycled Material

21% Steel
14% Aluminium Castings
2% Fabric

The chairs featured in this presentation are up to

99%
Recyclable

Component Recyclability

Our products are up to

99%

Recyclable

Did you know...

The fabric on your chair could be recycled to make mattress filling, lining insulation, toy stuffing or even another eco-friendly fabric that is made from recyclable material .

The plastic on your chair could be shredded, melted, extruded then moulded into new chair parts.

The foam on your chair could be chipped or crumbled and recycled for use in other hard-wearing applications such as underlay or sofa arms.

The metals on your chair can be recycled to make all sorts of steel products like bike frames, cars and paper clips

We only use the highest quality components when building our products, all of which contain up to 37% recycled material.

We continually strive for environmental excellence, changing and creating processes to help us lower our carbon footprint, successfully renewing our BSI ISO:14001 accreditation for another year.

1 actiV ERGONOMICS

PREVENTATIVE & CORRECTIVE SOLUTIONS.

Ergonomic seating is vital for well-being in the workplace. Well-being improves motivation, productivity and energy levels. Employers should consider actiV seating for their work force.

All the above information points towards the necessity for seating that offers adequate, variable and flexible support which can be adjusted sufficiently to suit the majority of the workforce.

The challenge to overcome the diversity of different body shapes and sizes resulted in the development of actiV - a highly engineered yet affordable ergonomic and posture solution.

NEW MODELS

Intro

Ergonomically Designed, Anatomically Correct.

The Intro range offers an affordable solution to posture seating for petite, regular and larger users. A choice of backrests allow you to select the optimum fit for the size and shape of a specific user. A multitude of optional extras can then be added, tailoring the chair to suit.

360° Swivel

Seat Height

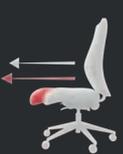

Back Height

Back Angle

Seat Angle

Seat Depth

Lumbar Support

Arm Adjustment

1. Headrest (HR)

Available on selected models, the addition of a height and angle adjustable headrest supports the user in reclined positions, relieving stress within the neck muscles.

2. Inflatable Thoracic Support (ITC)

Increases the contact area of the upper spine by filling the space between the shoulder blades, helping to prevent slouching and reduce pain/discomfort in the shoulder and neck area.

3. Inflatable Lumbar Support

Increases the contact area of the lower back, giving additional support to the lumbar area and supporting the natural curvature of the spine whilst preventing fatigue and lower back pain.

4. Coccyx Zone (CC)

A cut out / soft pocket located at the back of the cushion which provides a discrete solution to coccyx pain and provides pressure relief to the tail bone area caused by trauma or scarring.

5. Air-Flo Seat Cell (ASC)

A dual chamber air cell below the seat surface offers a "reactive sit" whilst providing cushioning to the sit bones, helping to improve core strength and reduce Sciatic pain.

6. Performance Seat Foam (PF)

Pressure sensitive to mould to the user's seated position, enhancing comfort and support throughout the working day. Also known as memory foam.

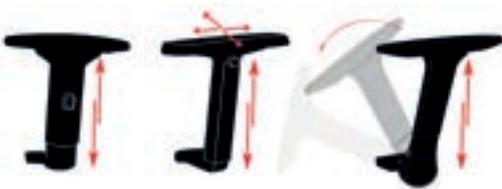

7. Seat Slide

Allows the user to increase the seat depth in order to optimise comfort and support and reduce the amount of pressure transferred to the legs.

8. Polished Base (AB)

As well as increasing the aesthetic appeal of the range, a polished base is also recommended for seating users who are in excess of 115kg.

9. Adjustable Arms

- A: Height and Depth Adjustable Arms (AA2D)
 B: Height and Foldaway Adjustable Arms (AF)
 C: Multi-Functional Arms (AMF)

Specification Overview

- Heavy duty 3 lever mechanism
- Independent seat and back angle adjustment
- Adjustable body tension control
- Seat slide - 50mm travel (optional)
- Ratchet back height adjustment
- Waterfall seat
- Inflatable lumbar support (optional)
- Three backrest options
- Three seat options
- Ergo-density foam

Me

One-Chair-Fits-All Technology.

Unique in its design,

The only chair with a backrest that is positioned on the rear of the seat in its smallest configuration, designed to support petite users. Lift the backrest for an additional 80mm of height and extend the seat by 125mm using the twin seat slide to fit the chair to the widest range of users.

A seating solution with everyone in mind. ME provides adjustments that adapt the chair to suit users of all sizes, by utilising a unique twin seat slide system, ratchet back height adjustment and multi-functional arms. The versatility of the range is further enhanced by a choice of four back rests.

ME reduces the need for replacement chairs and provides a one-stop chair solution for Facility Managers.

Solo

The definitive ergonomic project chairs.

Redefining comfort, support and adjustability.
Taking inspiration from the movement of the body.
Integrating style and function with posture seating credentials.
Synchronised controls with independent backrest angle adjustments.
A unique and modern solution to everyday ergonomics.

1. Headrest (HR)

Available on selected models, the addition of a height and angle adjustable headrest supports the user in reclined positions, relieving stress within the neck muscles.

2. Inflatable Thoracic Support (ITC)

Increases the contact area of the upper spine by filling the space between the shoulder blades, helping to prevent slouching and reduce pain/discomfort in the shoulder and neck area.

3. Inflatable Lumbar Support

Increases the contact area of the lower back, giving additional support to the lumbar area and supporting the natural curvature of the spine whilst preventing fatigue and lower back pain.

4. Coccyx Zone (CC)

A cut out / soft pocket located at the back of the cushion which provides a discrete solution to coccyx pain and provides pressure relief to the tail bone area caused by trauma or scarring.

5. Air-Flo Seat Cell (ASC)

A dual chamber air cell below the seat surface offers a "reactive sit" whilst providing cushioning to the sit bones, helping to improve core strength and reduce Sciatic pain.

6. Performance Seat Foam (PF)

Pressure sensitive to mould to the user's seated position, enhancing comfort and support throughout the working day. Also known as memory foam.

7. Seat Slide

Allows the user to increase the seat depth in order to optimise comfort and support and reduce the amount of pressure transferred to the legs.

8. Polished Base (AB)

As well as increasing the aesthetic appeal of the range, a polished base is also recommended for seating users who are in excess of 115kg.

9. Flex-Front Seat

Proven medical scanning has been used to show that using the forward tilt motion can lead to increased muscle activity in the stomach, hip and back areas. This enables segments of the lower spine to be set in motion, dynamically promoting good posture and healthy circulation.

Specification Overview

- Synchronised mechanism
- Adjustable body tension control
- Seat angle adjustment
- Seat slide - 75mm travel
- Independent backrest angle adjustment

NEW

YOU

The office chair range that was designed for you.

One range of seating, two levels. Working in parallel, working for YOU.

YOU was designed with comfort, support and durability in mind. Defined by mechanism, each range is available in both upholstered and mesh back options. At both levels the backrests are a key feature, with height, angle and lumbar adjustability integral to optimum support. Coupled with a flex-front seat to enhance the reclining movement YOU will improve ergonomic comfort. A stylish, contemporary solution for the workplace employee, remote worker or those seeking a corrective posture solution.

Konekt

Connecting the modern user to the modern world.

Today's modern world has connected people like never before. We look for fluid, creative and easily adaptable workspaces. Our individual task and collaborative seating expectations have changed ...
KONEKT: lightweight, smart, sleek, dynamic in function and style.

KONEKT simply connects...

Konekt's armrests add another dimension to the product...

Height and twist adjustments are not unusual, but combine that with a tilting angle feature and support is created for the gaming, tablet and mobile device user as well as the traditional desktop user.

Another connection is made.

The simple button activated weight balancing movement is unique - simple, smooth and like no other. The hinged frame allows for the anti-knee rise tilting action to naturally follow body movements, improving support and allowing a permanent connection between chair and user.

Complementary black and white frame finishes, backrest designs in upholstered or self-supporting mesh, the shade and effect combinations are endless when connecting the chair to the environment.

Specification

1. Modern stylish upholstered or mesh backrest choices
2. Lightweight frame
3. Contoured dual curved upholstered seat
4. Dynamic cable release body responsive lockable tilt
5. Unique anti-knee rise movement
6. Seat height adjustment
7. Integrated armrests with height and multi-angle adjustment
8. Black or white trim choice

Review

Retro, Stylish, Individual.

A new take on a simple design, swapping the rounded shapes for a more angular profile with the same base and frame options. Contrasting with luxurious fabric selections, a truly inspirational choice for the executive feel.

NEW MODELS

Reflect

A style and comfort statement.

Imposing, high level design inspiration, enforcing the concept that good style does not mean high cost. With emphasis on comfort, cleverly profiled curves are matched with a gently flexing back for that ultimate feel.

Quality Guaranteed

Hand made, assembled and upholstered in-house.

Solid wooden frame constructed from locally sourced materials.

Available in high quality fabric, leather and vinyl.

Expertly finished with superior stitching detail.

Enhancements available including electrical inputs, tables and TV brackets.

Comprehensive modular design allows for easy expansion.

Easy to configure and simple to install.

bTogether

Be Comfortable. Be Social. Be Together.

We have spent the last five years developing a competitively priced modular booth system that is strong, durable and aesthetically pleasing. Listening closely to the need of our clients, our in-house Design Team have refined our very popular bTogether concept to now include, bTogether Low and bTogether High. These have been added to the range to make this product the ideal solution for every client in any environment.

bTogether - BT2 Low, Medium & High Personal and Private.

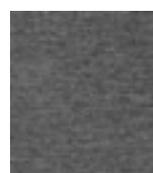

An expansive and flexible family of modular breakout systems reflecting the move towards comfortable and informal working, meeting and dining environments.

Quick Reference Fabric Guide

Your options are endless when it comes to choosing a material to upholster your seating in. We've tried to make things a little easier for you by compiling a list of the most popular selections in our fabric guide, letting you know which standards they conform to and whether the fabric your planning to use is suitable for the type of product you require.

Specification

We have taken great care to ensure that all details, descriptions, measurements and prices in this Product Guide are correct.

In order to give you the most accurate representation of our products, we have used colour swatches that have been provided directly from our fabric suppliers. Although every care has been taken to ensure that dimensions are accurate, manufacturing characteristics may vary slightly.

MDK Office Seating reserve the right to make any reasonable changes to specification or design as part of our continual improvement policy.

Dimensions Guide

SH	Seat Height	Distance from floor to top of seat foam
SW	Seat Width	Width of seat at its widest point
SD	Seat Depth	Distance from front of seat to backrest
BH	Back Height	Distance from top of seat foam to highest point of backrest
BW	Back Width	Width of backrest at its widest point
OH	Overall Height	Overall height of product
OW	Overall Width	Overall width of product
OD	Overall Depth	Overall depth of product
HR	Headrest	Height and width of headrest

Guarantee

For 8 hour per day use all models carry a full 5 year structural guarantee with 2 years on moving parts and upholstery.

For 24 hour per day use a 2 year structural guarantee applies.

These guarantees exclude unfair wear and tear and damage or failure caused by misuse.

All gas lifts are suitable for users up to 150 kg.
